

Turpentine Decking

Syncarpia glomulifera

A perfect Timber Decking - grown & manufactured in Australia from Certified Australian Hardwood.

Turpentine Decking ticks all the boxes:

- High Durability.
- Naturally Termite Resistant.
- PEFC certified hardwood.
- Suitable to be used in BAL 29 bushfire areas.

Turpentine is an Australian timber species tough enough to meet the harshest conditions that the Aussie climate can dish out, making it perfect as a deck.

Turpentine is resistant to termites, can be used in BAL 29 bush fire zones and has the highest natural durable rating for timber. This is why it's the timber of choice for applications that involve the most punishing environments – from being submerged in the ocean to the scorching Outback sun, Turpentine has been used extensively due to its unique properties.

Specification:
