THE BEAUTY OF TIMBER

The beauty of timber offers a natural warmth and feel, with many suitable species, colour tones, amazing grain patterns and durability required for a long-lasting serviceability of the Panel One product supplied by Hume Doors & Timber

RADIATA PINE

The Radiata Pine range of laminated panels offers an affordable solid timber panel with edge and butt joined pieces. This timber displays a beautiful texture of natural colour tones from cream to light straw all in one large section. The grain is usually straight and knots are a common feature. All Radiata Pine is responsibly sourced from plantation forests.

BLACKBUTT

The Blackbutt range of Panel One has a striking range of colours, spanning from golden yellow to pale brown. Occasionally a slight pinkish hue may be present in the timber. This timber displays an even texture and straight grain with presence of some black gum vein as the natural feature, attractive and hard wearing.

SPOTTED GUM

Spotted Gum is one of the most popular Australian Hardwood species. It's renowned for its appearance, durability and vibrant range of colours. The colours of Spotted Gum range from pale greyish brown and soft creams to shades of rich chocolate brown and red with a moderate inclusion of Black gum vein as the natural feature.

BLUE GUM

Australia Blue Gum has a distinctive variety of colours, ranging from soft pinks and deep reddish browns. The grain typically flows straight, with the occasional interlock. Gum veins are common in this species added to its distinctive look.
